

Lesson 3

1  58 Read and listen.

Amazing Animals

1 Bats aren't birds, but they have wings and they can fly. They sleep upside down. They don't sleep at night. They wake up at night and eat. They use their ears to find food.

2 Elephants are very big animals, and they live in big families. Elephants can run very fast, and they can swim, too! They can live to be seventy years old.
